Questionnaire:

#General Mission Insights

>Total Missions:

- What is the total count of space missions conducted?
- How many missions were conducted by each company?

#Company Analysis

>Missions by Company:

- Which company has conducted the most space missions?
- How do different companies compare in terms of the number of missions?

>Mission Status by Company:

- What is the distribution of mission statuses (e.g., active, retired) for each company?
- Which companies have the highest number of active missions?

#Temporal Analysis

>Yearly Trends:

- How many missions were conducted each year?
- You can filter and view the number of missions for a specific year or range of years?

#Geographic Analysis

>Launch Locations:

- What are the primary locations for space launches?
- How are missions distributed geographically across different continents?

#Rocket Status

>Rocket Status Distribution:

- What is the count of missions by rocket status (e.g., active, retired)?
- How many rockets are currently active versus retired?

#Financial Insights

>Cost Analysis:

- What is the average cost of missions by company?
- Which company has the highest average mission cost?

#Specific Missions

>Mission Details:

- What are the details of specific missions, such as the ones conducted by SpaceX and CASC?
- What is the status and other relevant information about specific missions like "Zuma" or "Ziyuan-3 03"?
